Caring for Courtney

Princess Courtney

has a terminal illness called Spinal Muscular Atrophy in it's most severe form, type1. She can not sit, stand, roll over, talk, swallow or even breathe on her own. Her brain is not affected, she is not mentally impaired. You can not "catch" SMA by being around her.

It is a genetic disease passed on by both her parents.

One in every 40 of us are carriers and one in every 6,000 births is affected by SMA. As of now there is no known cure or treatment for SMA. Please join us in praying that researchers will soon discover a cure for SMA for Courtney.

"We believe in miracles!"
